Functions

The most important part is the engine in Reports.net. We offer features to create defined ledger sheets by report definition file as to .NET applications and can preview work as an application.

There are features as to preview below.

- Read “Report Definition File”
- Preview “Report Definition File”
- Print “Report Definition File”
- Read “Print Data File”
- Preview “Print Data File”
- Print “Print Data File”
- Save “Print Data File”

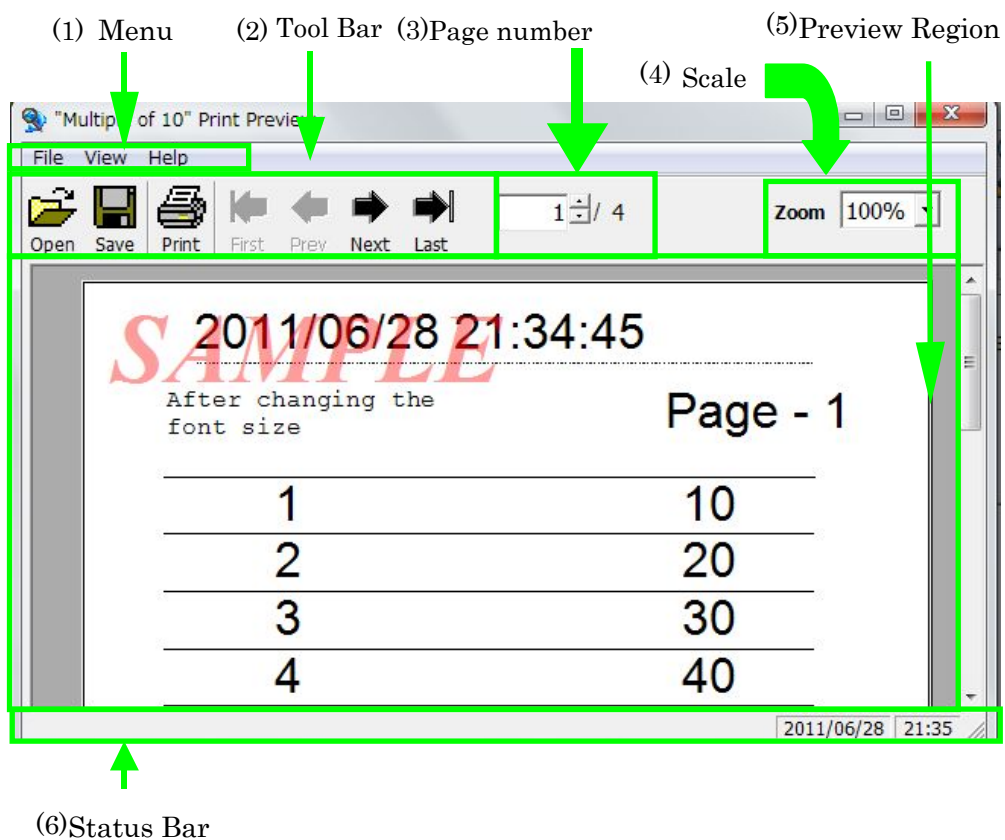

Operating Conditions

In order to use this software, a computer which meets the following requirements is needed.

OS	Systems that operate Microsoft, NET Framework sufficiently
Computer Memory	Equivalent to the memory allocation which allows Microsoft .NET Framework to operate sufficiently.
Recommended Screen Resolution	Engine : no special limit Designer: resolution should be over 1024×768 and font size is standard small font.
Developing Environment	Microsoft Visual Studio .NET has been installed. (In using only Report and preview, no developing environment is needed.)

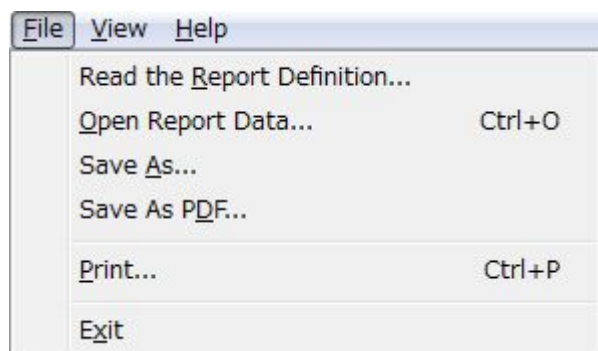

How to Use

Name and Features

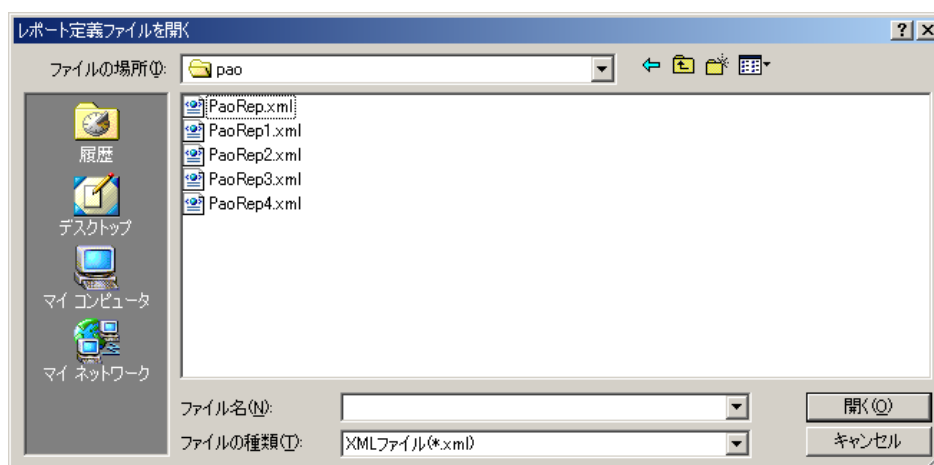

(1) Menu

1. File

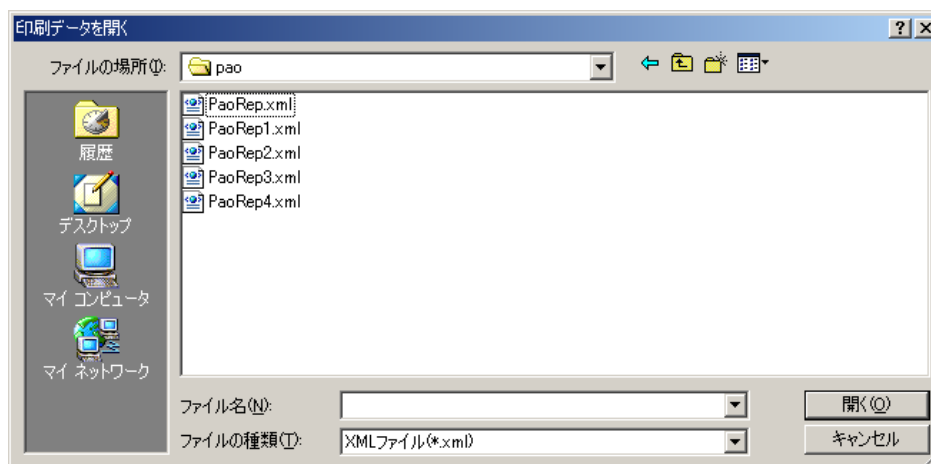

① Read Definition File

Read a report definition file, and preview it. It appears in the file selection dialog box. Direct the report definition file to open the report and preview it.

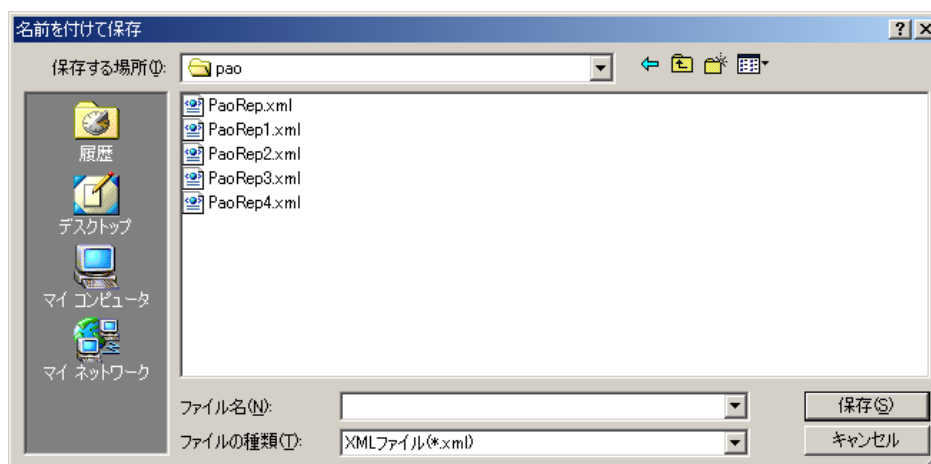

② Read Print Data File

Read print data files, and Preview them. It appears in the file selection dialog box. Direct the print data file to open the report and preview it..

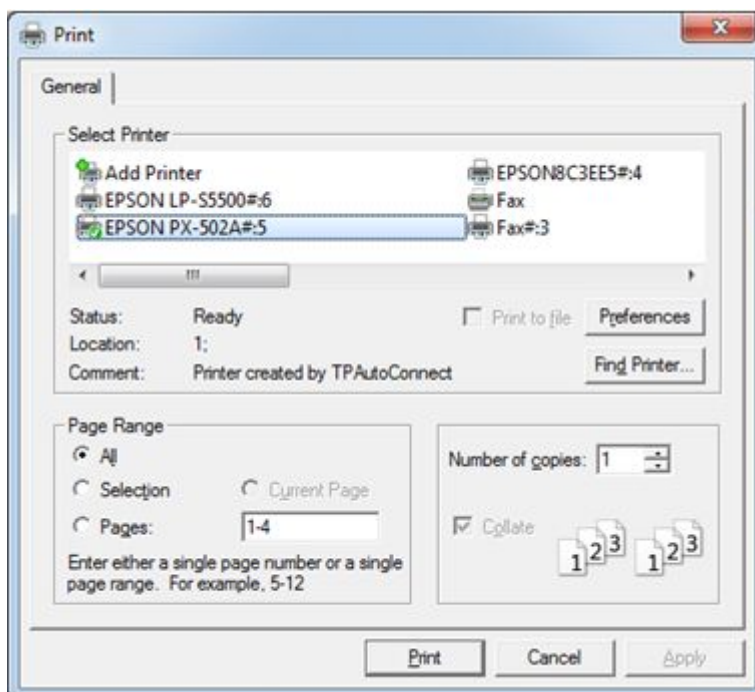

③ Save

Save new print preview data as New Print data. You can select the report definition file when you preview. When file selection box appears, enter the file name and save.

④ Print

Print data from previewed data. Print dialog box appears and you carry out print after setting up

※In the case of printing page by choosing selected sections, you can print only page which it is previewed.

⑤ Recent History

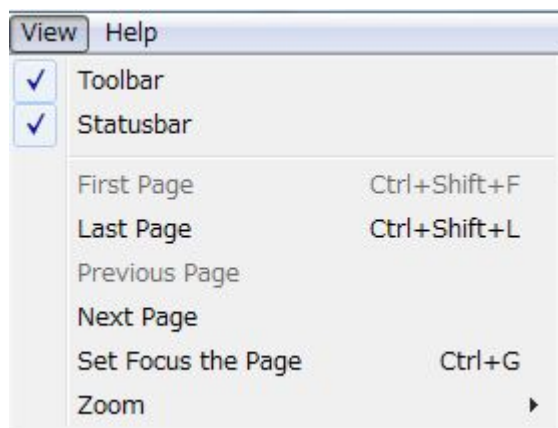

Recent opened file histories are saved until 10. After that, previous histories will be deleted.

(History Information is saved in Reports.net Folder which is created in each Application Data.)

⑥ Exit

End Preview
